

March 9, 2009

Katie Bowman  
CA Regional Water Quality Control Board  
415 Knollcrest Dr., Suite 100  
Redding, CA 96002

Dear Katie:

This letter is a formal request regarding *Waste Discharge Requirements* for Lake Oroville Marina NO. R5-2009-XXXX. Lake Oroville Marina requests that the maximum daily discharge be increased to 7,000 gallons a day. As you probably know, with our new contract we are required to rebuild the facility which will include flush toilets on the dock with a snack bar. When demand warrants it we will also be increasing the size of our houseboat rental fleet. These changes plus the grey water requirements on Lake Oroville will on a few occasions exceed the current 5,000 gallon limit in the summer months of July and August. We do not anticipate any further increases of this 7,000 gallon a day limit.

Should you have any questions or concerns, please call me.

Respectfully,

Bill Harper, CMM  
General Manager  
Lake Oroville Marina
